Organizational background:

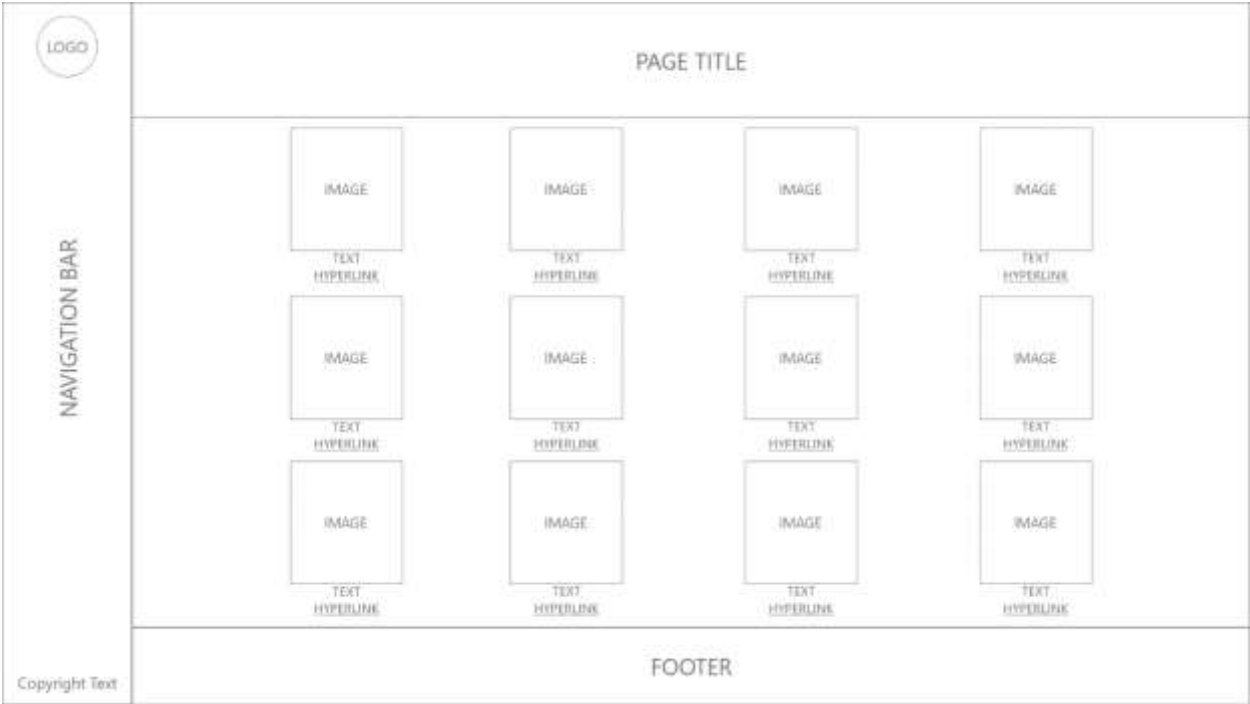

This restaurant was founded in 2021 during the covid-19 pandemic by Karyl Charles. Karyl saw that many restaurants were closing and going out of business due to new stay at home and no gathering policies. Karyl saw a solution that no business was taking advantage of, which is ecommerce. Persons can order pizza right from their home and have it delivered right to them. Karyl developed a fantastic website where users locally and regionally can order delicious pizza. Karyl establish restaurant branches where all over the Caribbean where his business can provide services. Karyl's Pzza Restaurant offers many different varieties of pizzas and gives the customer the option to customize their pizza however they like. Customers can order pizza on our website or through telephone and don't ever have to leave their home. As of lately Karyl's pizza restaurant has been successful and soon will go internationally, thanks to adapting to the current environment karyl's pizza restaurant is here to stay.

Index page:

Index page description:

The font used on this site is poppings. The semantic elements used on this page is header, nav, main, section and footer. The navigation bar is set to float left with a width of 15% and position fixed. The first section has a background image that covers the entire section. Within this section is some text and button which is positioned absolute to the empty space in the section. The next section which is floated right of the sidebar has a title centered with a font size of 36px. And paragraph text. There are also four images with text below and are displayed in grid. The next section which is also floated to the right has a title with a font size of 36px and a heading on top with the color red. This section has a grid display and each column has an image with some text and a hyperlink text that is designed as a button using padding and background color. The next section which is floated to the right has a flex display with an image to the left and some text with a button below. The background of this section is red, the size of the image is 75% to make it responsive and the text color is white. The button is a hyperlink that is designed to function like a button using the same technique as before and when hovered changes to orange. The last section has a title that is 36px and a smaller heading. This section has four images that is displayed in grid columns of four. The images are rounded using the border radius in css. Each image

has text below it. Below is centered text with images aligned on both sides. To achieve this the display flex was used. Next is the footer which has a background color of light black and displayed in columns of three. The first column has a second logo with text below it. The next column has a table displaying the opening hours. The last column has site links to other webpages on this website. Each of this links has a hover effect and changes to orange when hovered.

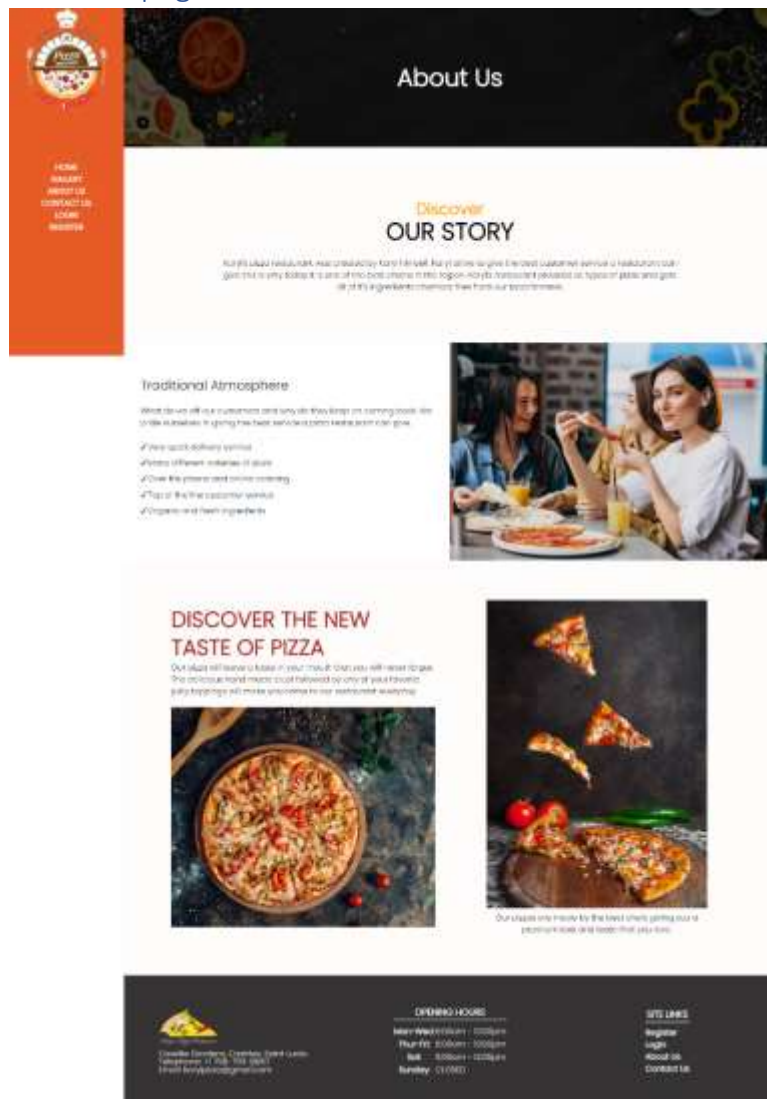

Gallery page:

Gallery page description:

In this page the first section is the title banner, which has a height of 40vh with a h1 element centered in the middle. It has a background picture and a linear gradient to give it a dark look. The next section of this page is displayed in a grid of 3 columns. Each grid has an image that is sized 75% and below it has an h3 element, a p element and an anchor element. The anchor element has a border bottom and when hovered over the anchor it changes orange. The entire padding of the grid has a padding of 50px top and bottom to give some space.

About us page:

About us page description:

The first section of this page is the title banner which is done the same as the gallery and other pages. The next section is a short description of the company which has a h3 element that has a font size of 200% and color orange, the h2 has a font size of 300% and all the elements in this section is centered and has a padding of 100px for space. The next section has a grid of 2 columns, the first column has an h3 element with a font-size of 160% and font weight of 300. The next is para graph text followed by an unordered list with a before element to give it the tick symbol. On the other column is an image with a width of 100%. The next section is another display column of two, which has an h2 element with a font size of 270% and color brown. Below is followed by some paragraph text that has a width of 90% , below is an image with a width of 75%. The next column which spans a row of two consist of an image with a width of 90% with some text below.

Contact us page:

The screenshot shows a web page for 'Pizza'. It features a top banner with a pizza image and the text 'Contact Us'. A left sidebar contains a logo and navigation links: HOME, GALLERY, ABOUT US, CONTACT US, LOGIN, and REGISTER. The main content area is titled 'Get in touch' and contains a 'Contact Details' section with contact information and a contact form with fields for Email, Subject, Phone, and Message, followed by a 'SEND MESSAGE' button. The footer includes a logo, contact details, opening hours, and site links.

Contact Details

get in touch with our pizza or we will send you a pizza to your home. you have time to eat it anytime during our opening hours. Our customers need not to wait for a pizza (only).

Contact us page description:

The first section of this page is the title banner which is designed the same as all the other pages. The next section consists of a grid in two columns. The first column has an h3 element that has a font size of 140%. Below it is some paragraph text that has a font size of 80% and a width of 70%. Below are some images alongside them are anchors. The images have a width of 8% and is vertical aligned with the anchor. The anchor elements were used to give it the cursor hover and it also changes to the color blue when hovered over. The next column consist of a form which only has input elements and one text area element. All the input elements and button all share the same width of 80%. All the input elements and text area elements has a placeholder text to describe the input box. The button is a background color same as the side bar with white text, when hovered the border become orange and the text becomes orange as well. The entire section has a padding top and bottom of 60px.
